

BLAMHD11H

Features:

- 1-Way Variable Fixed Gain 27dB
- Power LED on Amplifier
- Foam Seal Cable Entry Glands
- F-Type Connectors

Elevate your reception quality with the RED Class 1, Blake 1-Way Variable Fixed Gain 27dB Masthead Amplifier. This CE/UKCA compliant amplifier offers exceptional performance, incorporating advanced 5G/4G LTE filtering and amplification for TV frequencies within the 21-48 band (470-694MHz). With its fixed variable 527dB gain and low noise figures (<2.5dB typical), it ensures optimal signal strength and clarity. The amplifier features F-type connectors on both inputs and outputs for easy connectivity.

Frequency Range	Gain	Noise Figure
470-694MHz	27dB	<2.5dB
