

BLAMHD18V

Features:

- 90° Wide opening door that clicks open/shut
- Power LED on amplifier
- Foam seal cable entry glands
- Low noise linear power supply
- F-Type connectors

Elevate your reception quality with the RED Class 1, Blake 8-Way Variable Gain 5-20dB Masthead Amplifier. This CE/UKCA compliant amplifier offers exceptional performance, incorporating advanced 5G/4G LTE filtering and amplification for TV frequencies within the 21-48 band (470-694MHz). With its variable 5-20dB gain and low noise figures (<2.5dB typical), it ensures optimal signal strength and clarity. The amplifier features F-type connectors on both inputs and outputs for easy connectivity.

Frequency Range	Gain	Noise Figure
470-694MHz	Variable 5-20dB	<2.5dB
