

## BLAMHS18P

### Features:

- Can be used to combine signals
- Boosted signal through the output
- F-Type
- 1 input, 8 outputs
- Suitable for outdoor use

Screened wideband units intended for splitting digital aerial feeds in strong signal conditions where the use of distribution amplifiers or active splitters is unnecessary. These products can also be used as general-purpose signal splitters or combiners. Triple filtered: 5G, 4G, & TETRA

Product	Ways	Frequency Range (MHz)	Insertion Loss VHF1 (dB)	Insertion Loss UHF2 (dB)	Output Isolation (dB)	Power Pass3
BLAMHS18P	8	47-862	<7.3	<8.2	>22	Yes
